Group project

Rico Krueger

Transport and Mobility Laboratory
School of Architecture, Civil and Environmental Engineering
École Polytechnique Fédérale de Lausanne

3 March, 2020

Project overview

Aim:

- Apply the methods you learned to solve a real-world problem.
- Each group works on a different example.

Objectives:

- **Simulation**: develop a discrete events simulation and appropriately evaluate the performance in two different scenarios.
- **Optimization**: define and solve an optimization problem to obtain the optimal solution for the system.

Case study

Simulation:

- Develop a discrete events simulation.
- Identify the appropriate statistical indices.
- Correctly use simulation techniques to generate results.
- Correctly analyse the simulation results.
- Consider the efficiency and precision of simulation.

Optimization:

- Identify the decision variables.
- Define an objective function.
- Design an optimisation algorithm to solve the problem.
- Achieve a meaningful result and good interpretation.

Focus

Keep in mind:

- **BE CREATIVE**: You can make any additional assumptions that you deem to be appropriate.
- **Think deeply** about the assigned problem (extreme cases, worst case, probability of events, ...).
- **Perform an appropriate statistical analysis**, e.g., not only average, give MSE of your estimates.
- **Consider the efficiency of your implementation and your solution.**

Group and project

Group	Project	Title
Group 1	Project 1	Jeans store management
Group 2	Project 2	Drone delivery service
Group 3	Project 3	Train service
Group 4	Project 4	Airline yield management
Group 5	Project 5	Online movie streaming

Groups 1-3

Group	Name
Group 1	Matteo Barsanti
	Yara Kayyali
	Olga Pushkareva
	Andrey Vasilyev
Group 2	Baptiste Busi
	Penglong Li
	Son Pham-Ba
	Manon Voisin–Leprince
Group 3	Juan Carlos Farah
	Anna Karpova
	Sébastian Le Fouest
	Yann Martinson

Groups 4–5

Group	Name
Group 4	Nicola Ortelli
	Janody Pougala
	Haoran Shi
	Brian Sifringer
Group 5	Emil Gallyamov
	Tatjana Milojevic
	Garcia Salem
	Mi Xue Tan

Presentation of the project

- **May 26**, 2020, GC B1 10.
- Make sure that the first presentation will start 13:15 on time.
- 25 minutes presentation and 10 minutes Q&A.
- You should include both simulation and optimization parts.

Group	**Time**	**Review**
Group 1	13:15-13:50	Group 3
Group 2	13:50-14:25	Group 4
Group 3	14:25-15:00	Group 5
15 minutes break		
Group 4	15:15-15:50	Group 1
Group 5	15:50-16:25	Group 2

Project submission

- Submit **by e-mail** to `rico.krueger@epfl.ch` and `melvin.wong@epfl.ch`
  1. **PDF file** for the presentation,
  2. **Jupyter notebook** for the project,
  3. **Jupyter notebooks** for the labs.
- Deadline: **Noon on Monday, 25 May**.
- Subject: "OptSim20 project: Group X"
- File: make one zip file "Group$X$.zip".

Any
Questions?
