

BI Internship Master / 2020

Created 26.11.2019 by **Verdane Advisors**
AS(<http://www.verdane.com>) | Finance

Oslo

Deadline: 01.03.2020

2 places

Our goal is to be the preferred growth partner to tech-enabled businesses in Northern Europe. We invest in high-growth companies in the e-commerce, software, energy technology and advanced industrial sectors.

What sets us apart is our growth experience, flexible investment mandate and our ability to provide hands-on support through local teams based out of six locations in Northern Europe.

Offer description

Want to work with analysis and business intelligence in a Private Equity firm focused on tech-enabled businesses?

Verdane's Data Analytics department are looking for 1-2 interns to help drive our analytics momentum in 2020, and help Verdane take better data driven decions. To get there, we will need to supply better and more relavant data, more often, to our stakeholders.

You will be working on a larger initiative across the internship - but should expect to provide ad-hoc analysis when needed.

You will have the chance to:

- analyse complex data sets to identify key trends and insights that drive decisions for an investor
- analyse company performance to identify winners and underperformers, to help investment professionals take correct action
- create analysis that support key objectives in the organisastion - from potential fund raises to investment decions, via portfolio company analysis.

What we offer:

We can offer a high pace - high responsibility work place within a fast growing and exciting Private Equity firm.

A chance to learn Business Analytics on not just one uniform company, but 80+ different companies within our portfolio

A chance to understand a complex and exciting industry

Free office lunch

Qualifications:

We are looking for someone who:

are analytical of nature

can see the big picture

have the ability to see patterns where others just see numbers

has an understanding of how Private Equity works

is an advanced user in Excel

is familiar with Power BI

is fluent in written and spoken English

have a passion for analysis and technology

understand complex data warehouse

experience with Google BigQuery is a plus

You need to fit our corporate values by:

daring to be different; an important part of our business is about seeing opportunities where others see problems

getting things done; we strive to help colleagues and business partners to focus on key issues and to shorten decision making cycles.

having respect for people and the environment; our business is built on people. To get the best out of people they need to be respected and valued. We believe respect is based on an open dialogue.

loving what you do! We consider ourselves lucky in that we get to follow so many exciting companies on their growth journeys.
