**Letter of recommendation for Penglong Li**

Penglong Li, currently in his first year of the M.Sc. in Business Analytics at BI Norwegian Business School, has attended my course GRA 6227 Business Optimisation.

It is clear to me that Penglong has a distinguishable talent for learning and applying analytical methods, in particular optimization modeling. Moreover, he appears to be an energetic person always looking for intellectual / analytical challenges.

Penglong Li is among our very best students and is a great example of the type of capable student we want to have in our M.Sc. program in Business Analytics. I give him my best recommendations.

Should there be any concern, please contact me for further clarification.

Best regards,

Atle Nordli

Associate Professor

Department of Accounting, Auditing and Business Analytics

BI Norwegian Business School
